Total # of hours worked this week: [8]

What you accomplished (or attempted) this week:

This week I resolved the primary issue from my intermediate presentation. I was able to distinguish which neighborhoods were subsections of a larger neighborhood. The statistics from these neighborhoods were consolidated into one for visualizations.

Any setbacks/roadblocks you experienced:

Procrastination was a major roadblock that caused me to work at very unreasonable hours in order to meed submission deadlines. Additionally the work was not of acceptable quality and needs to be revisited.

What you plan to work on next:

Next week will be spend on revising the poster primarily. Secondarilly, I want to finalize the dashboard design with the hope to have it ready for the final poster.

Are you on track? If not, how will you get back on track?

I am behind. I will need to put at least 2 meaningful hours of work into this project each day this week.
